Anti-Aging Clinic & Dispensary Inc.

Judging by the multiple awards won by The Anti-Aging Clinic in Orillia, word is out that we have a world-renowned anti-aging specialist living in our midst. Blade Tiessen a Para-Medical Aesthetician and owner of the clinic, pioneered medical micro-needling protocols internationally and has trained doctors from around the world including training doctors to the Kardashians, Michael Jackson and Sean 'P. Diddy' Combs.

Blade was the first in Canada to pioneer, specialize and educate in medical micro-needling as well as cosmetic PRP (platelet rich plasma) educating doctors internationally on his patent-pending protocols, a revolutionary anti-aging skin procedure for improved skin appearance attaining natural long lasting results. Blade's protocols have been quoted globally in magazines like Dermapen™ World and Women's Journal USA as yielding superior results.

His clinic was the first of its kind in the region as well, celebrating its 20th year in Orillia while over the past decade Blade has been travelling the world privately teaching Doctors and Medical Aestheticians his exclusive

techniques which are documented on his blog @ www.bladetiessen.com.

With over 33 years experience Blade is also an educator and guest speaker for large equipment companies at congresses, currently teaching his techniques for two manufacturers including Scarlet™ Micro-Needle with Radio Frequency (small needles are injected into the skin emitting short-pulsed RF for enhanced skin tightening and lifting results) along with JetPeel™ the latest craze in needle-free PRP (uses patented aviation technology and saline offering a non-irritating hydrating exfoliation as well as painless needle-free dermal infusions) both available at the clinic.

Under the direction of Blade (also won Dermatologist) the clinic is a full-service Med-Spa, with associates Ben Tiessen (Clinic Co-Ordinator, body and Cold Sculpting™ Technician) and Medical Director Dr. Rodney Land (also won Cosmetic Doctor). The clinic has become so successful that the team recently relocated to a larger, 3,500 square foot facility at 43 Colbourne St. West in Orillia last year.

The stunning new spa-like clinic boasts

7 spacious treatment rooms stacked with state-of-the-art equipment for skin resurfacing, non-surgical face lifting, skin tightening, hair regeneration, laser liposuction and cellulite reduction along with a medical fitness facility incorporating DKN™ Whole Body Vibration with an Alpha Sauna Pod™ as well as the Beauty Angel™ total body red light anti-aging booth and even an "oxygen bar" as well as Blade's new training facility where Doctors can come to learn from the best of the best.

Blade also uses his knowledge of skin and skin care ingredients along with artificial intelligence programs to create custom compounded personal medical grade dermatological skin care products that offer exactly what each patients skin requires.

"Our patients have access to the most advanced technicians and treatments available for any skin issues such as acne, scars, pigmentation, wrinkles and all age-related face and body issues including treatments for weight loss, body sculpting and cellulite reduction" adds Ben. It's no wonder the clinic earned the name 'Orillia's Fountain of Youth!'
